

Assignment

---

You are requested by a property development company named “*myProperty*” to design a website using HTML and CSS to display properties (single houses and apartments) that are sold by the company. The following links are provided on the Home page:

- About us – details about the company and the top management
- Apartments for sale – details about various apartments to be sold (including location, apartment size, facilities, image, number of apartments, and price)
- Houses for sale – details about various houses to be sold (including location, land size, facilities, image, and price)
- Contact us (including the location of the head office on a map)

The website should contain five pages (including the home page) following the same webpage layout.

Use appropriate HTML elements according to the format and purpose of the content to be displayed on the web page.

The content should be created using HTML and all styling and layout related instructions should be handled using an External CSS file.
